

What kind of garbage can I put in the cart

Typical household trash of course—as long as it fits under the lid. Items that cannot be placed in the tipper carts are: dirt, sod, rock, yard waste, large appliances or furniture, concrete, tires, or dead animals or construction debris. The carts can melt! Never place hot ashes in the cart. Do not place hazardous liquids or chemicals such as paints, oil, corrosive solvents, pool chemicals, pesticides, etc. into the container.

What if the cart is not sufficient capacity for my garbage?

All of your trash other than recycling and or bulk special handle items must fit into the tipper cart. Arrangements for any trash outside the cart must be made in advance and extra charges will be applied. But you will be surprised how much the carts can hold. The other option is to rent a second tipper cart. Please call our office for more information.

How do I get a tipper cart delivered to my residence?

Call our office at 712-748-3471 or 800-730-3471 to set up an account for the rental of the tipper cart. There is a small agreement that must be signed and returned to our office. All carts remain the property of R & S Waste Systems, Inc. and may not be removed in the case of a move. Tipper cart rental is \$3.00 per month, not including the trash removal fee.

What are Tipper Carts?

R & S Waste Inc. has gone semi-automated with the introduction of 95 gallon tipper carts.

No more dragging out trash cans!

These 95 gallon carts are specially designed wheeled containers for household garbage.

The garbage truck is equipped with a lifting mechanism in the rear. The operator wheels the cart to the lifter and the mechanism automatically dumps the cart.

The process takes about 10 seconds. After collection the resident rolls the durable, weather-resistant cart back to either its indoor or outdoor storage place.

Why are Tipper Carts Better than regular Trash Cans?

- No need for you, our customer to purchase new cans.
- No more lost trash can lids. Our tipper carts are extremely durable with attached close fitting lids.
- No more looking for your trash can after a windy day. The carts will not blow away in normal weather conditions.
- No more “carrying out the trash” to the curb. The tipper carts are maneuverable and easy to roll.
- Surveys have shown that one 95 gallon cart per household per week takes care of most normal can needs. Residents are encouraged to recycle to save space in their cart. Visit our web site @ www.rswaste.com to watch our video on how to recycle properly.

Who is Responsible for the new garbage container?

The container is the property of R & S Waste Systems, Inc. However, you are required to care for it as your own. In the interest of cart cleanliness and to keep the smell down we encourage you to use plastic bags for wet garbage and to rinse it out regularly with a garden hose.

Each container has a serial number that is recorded in your account at our office. If your container is stolen call the police department and then our office.

The molded carts are extremely durable and can withstand even the toughest abuse. We will repair all damaged containers except damage due to customer negligence or abuse.
